

# FILE CABINET LOCKING BARS

## ABUS

There is a rolling design change on the bar. The new bar has a powder-coated finish and knob in center of bar for easy and smooth operation.

NUMBER	LENGTH
ML-1	11"
ML-2	21-1/2"
ML-3	33-1/2"
ML-4	45"
ML-5	56"

Stock # & number of drawers are the same.

### Multi-point locking design

Red inner slide bar interlocks with specially designed locking lug hinge at each drawer opening when in locked position. This multiple point locking principle eliminates torque on the bar usually found in devices that lock at the top and bottom position only.

### Spring-open action

A slight upward motion of the red inner slide bar releases all lock points, permitting the built-in spring-loaded hinge to swing bar clear of drawer openings. Engineered to give sufficient clearance for unrestricted access to adjacent files when locked or unlocked.

### No storage—accident—damage problem

Since Multi-Lock bars become an integral part of the file and swing clear of drawer openings, they solve the problem of storing heavy, dangerous bars in the office.

### Simple installation

Can be installed with blind rivets provided or steel metal screws\*. Whichever method is used, the integrity of the fastener is protected, since the points of attachment are completely covered by the bar in the closed position, effectively preventing surreptitious entry. Multi-Lock can be installed without opening the file or disturbing the contents—in a matter of minutes.

Drill upper rivet hole(#20 — .161 diameter) 2-3/8" down and 1/4" over from the upper drawer opening. Insert and set rivet to hold bar in place. Use hinges as locators for other holes. Drive rivets home while keeping hinges firmly in place against file.

The inner slide bar can be reversed to permit installation on either right or left side of file cabinet(normally supplied for left side installation). \*If installation with sheet metal screws if preferred, use #8 X 3/8" pan head, type A.

### SPECIFICATIONS

Constructed of heavy 16-gauge formed steel. Chrome plated. Inner slide bar finished in red thermosetting acrylic enamel. All hinges and locking lugs are of 16-gauge steel. Chrome Plated. 5/32" diameter cherry rivets supplied.

AB-83-45 -300

### From ABUS to Z-bar... "The Convertible" solid brass rekeyable pin tumbler padlock.

In seconds the 83 Series converts to either a key retaining or non-key retaining padlock. (All it takes is a Phillips head screwdriver.) This means that in just one lock you have the instant capability to meet your customer's needs for either key retaining or non-key retaining security. The Z-bar makes the difference.

With the Z-bar in place, the lock is key retaining, lift out the Z-bar and the lock is non-key-retaining. Without question, the most versatile rekeyable pin tumbler padlock you've ever seen.

And consider the advantage the 83 Series gives you in controlling your inventory. No longer is there a need to stock two padlocks. One lock...the ABUS 83 Series does it all. Eight shackle choices (must order separately), 1", 2", 3", 4" solid brass or hardened steel adds to the convertible features of this lock. This is definitely the quality convertible padlock that locksmiths have been asking for.
