RSF-1 Retainer Staking Fixture for GM Auto Locks

The tumbler retainers on GM Auto Locks must be staked out to prevent their popping out and causing unneeded "lockouts".

This case hardened vise-held fixture grips the core tightly without distortion while staking the four corners of the retainer with a small chisel-edge punch.

Rigid bottom holds without any giving or "bounce" as may occur with spring loaded, adjustable holder. Also ideal for holding most other standard pin tumbler cylinder cores.

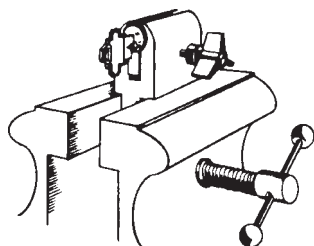

HPC

CPH-5

Multiple cavity vise type. Fits the five most popular sizes. Holder bodies are hardened and have a black oxide finish.
(.404, .504, .508, .512 & .556)

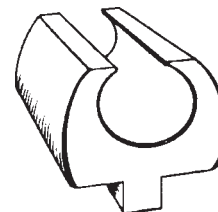

HPC

SUT-600 Adjustable Plug Holder

The Adjustable Plug Holder is a universal plug vise. A plug holder that adjusts its own hole size from .350" to .600" to give a perfect fit on many different cores. Plug vise body and slide are hardened and have a black oxide finish.

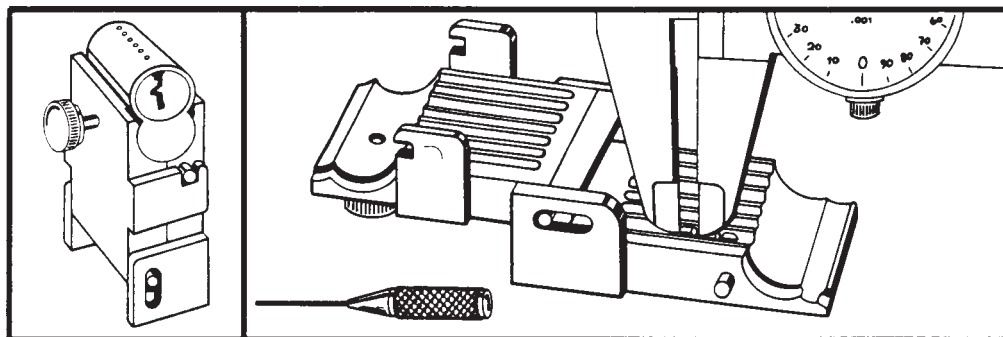

HPC

CPH-10 .510" hole

Made of hardened bar stock, so as not to become scratched by the file. Black oxide finish. Will accommodate the following cores: Acrolock, Arrow, Corbin (except oversize and small pins), Eagle (except small pins), Ilco (except peanut cylinder), Keil, Kwikset, Lockwood, National of Rockford (except KNK), National of Ozone Park, Nesco, Russwin (.500" dia.), Sargent, Schlage, Weiser, Yale (except small pins).

A-1

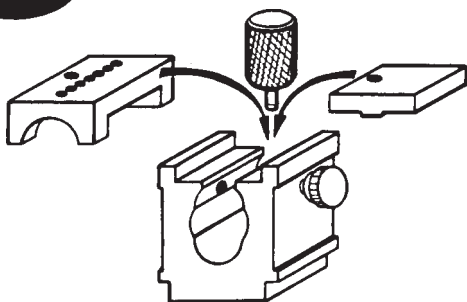

A1-TB1 The Block

When a control-key code must be found for an interchangeable core system. The Block offers an easy-to-use, foolproof answer. Simply drive the pin stacks into The Block where a pin tray area keeps them separated and in order. The Block works better than shimming or disassembly in the hand because when it's opened, all pin stacks are easily accessible and yet secure. Constructed of anodized aircraft alloy. The Block is Compact, rugged and easy to use.

CAPPING BLOCK

A1-TB2

Our Capping Block has the added advantage of offering two tops allowing you to cap Best, Eagle, KSP, Arrow and even the Falcon Style with the "slide" style spring cover. More than just a Capping Block, this tool is a complete and versatile workstation. No mobile shop should be without this time-saver.

DUMPING BLOCK

A1-TB3

With A-1's Dumping Block you have the added security of knowing that your customer's security is maintained. Dump old cores to assure that no one can determine the control key code of your system. Also a BIG time-saver when re-keying, this tool will allow you to dump and hold the contents of dozens of cores.

EJECTOR PUNCHES

A1-TBIP

Originally designed for use with The Block, this punch is suitable for most any I/C core.

A1-TBMP

Use this time-saving, 4-pronged punch to eject cores. Suitable for manual use and with A-1's Service equipment. Ejects cores with TWO hits instead of 6 or 7.
