

LOCKSMITH TOOLS

CLIP TOOL

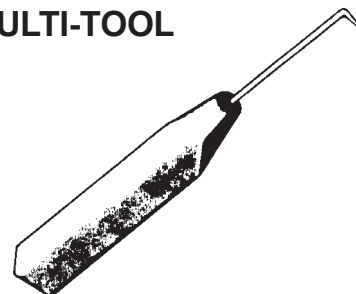

SET OF TWO

CR-2

The HPC Clip Tool (CR-2) has been designed to remove C type snap rings quickly, easily and safely. The Clip Tool will remove snap rings found on: Schlage F Line Knob Locks, Kwikset Knob Locks and Deadbolts, Arrow Knob Locks, Yale Knob Locks, Lori Rim Cylinders and more.

MULTI-TOOL

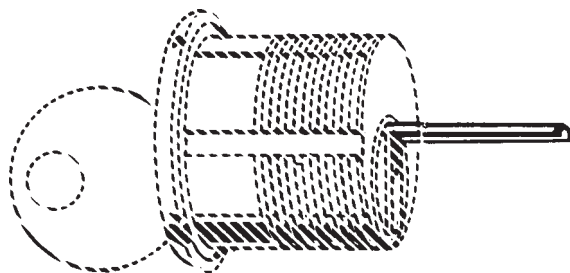

ES-CJ-34 Multi-Tool

Here's a truly unique tool with hundreds of different uses! The ES-CJ-34 is just what the doctor ordered for pulling small springs, especially on mortise locks or knob tension springs on Schlage L locks or on any lock where there's no room to use your fingers or pliers. What's more, it's great to take tru-arc rings off of cylinders and it's a tremendous aid in taking the caps off key-in-knob cylinders and rim cylinders such as those made by Lori, Arrow, AWI, Dexter, Sargent and Schlage, to mention a few. Other uses include depressing the pin to remove Corbin and Russwin knobs and taking the wedge out of Schlage A80 cylinder Locks.

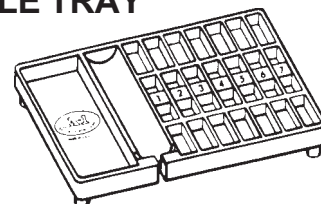

Those are just some of the uses, but as you work with the Multi-Tool, you'll discover uses we never even thought about! Developed by a professional locksmith, it's the handiest tool to come down the road in years!

CURVED SHIM

SCS-25 Package of 25
SCS-100 Package of 100

WAFFLE TRAY

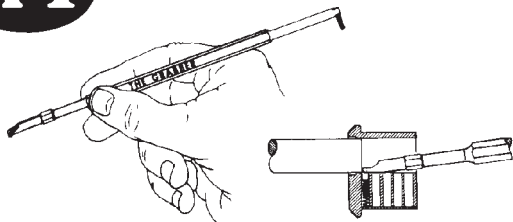

A1-WT1

Keep springs, pins and plugs neatly separated and in numbered pockets with this popular tool. Manufactured from coated metal, the Waffle Tray is compact and stackable.

THE GRABBER

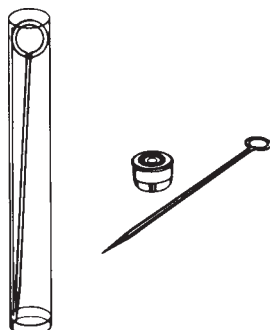

A1-TG1

If you're tired of dropping pins and springs from conventional tweezers, order A-1's Grabber. Pins and springs snap into this double ended tool. While they are held firmly, they release almost at will. MADE OF SOLID BRASS.

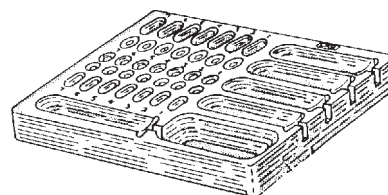

THE DOWNIE PIN

A1-DP1

This is a handy tool for manipulation in tight areas. A valuable addition to any pro's toolbox, it's just right for so many jobs. Set includes two pins and a carrying case.

PIN BLOCK

LB-LPB 001

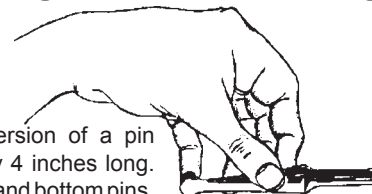

The Pin Block is made of Maplewood and can hold 5 plugs. Use with your fingers or tweezers. Actual size: 5" x 4-1/2".

COMPACT PIN TUMBLER TWEEZERS

PTT-5

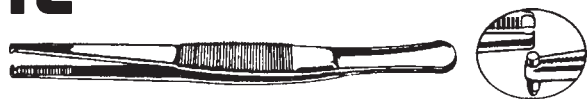

Another, but shorter version of a pin tumbler tweezers. Only 4 inches long. Milled tips firmly grip top and bottom pins. A compact, pocket-sized keying aid.

LOCKSMITH TOOLS

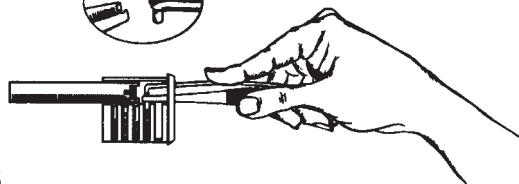

PIN TUMBLER TWEEZERS

PTT-4

The groove in the tip provides a firm, non-twisting grip on cylinder pins for easy loading. The tip is also milled back so that the outside diameter of a standard .115" diameter pin extends past the tip. This permits "butting" the pin against the end of the plug follower when loading the upper chambers, providing added control when holding top or master pins of varying lengths.

TPT-5

This improved pin tumbler tweezers has a pin pushing attachment that makes it easier to load top pins into a cylinder. While top pin is held in place, use forefinger to push attachment down to set pin into chamber. Pin loading wire is removable, making this also ideal for loading bottom pins.

PIN TUMBLER TWEEZERS

IL-899-00-51

Pin tumbler tweezers, 6" in length, pin holder tip.

IL-900-00-51

Short pin tumbler tweezers, 4" in length, pin holder tip.

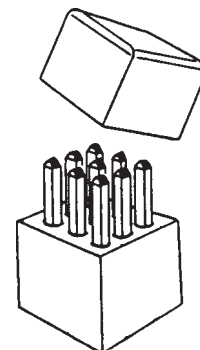

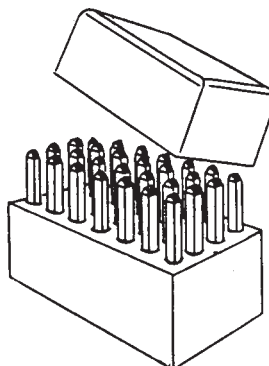

FORMED END TWEEZERS

LB-LZT 001

Perfect size and weight. Stainless steel with a formed end.

FIGURES

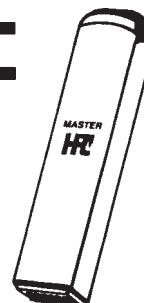

SFS-3/32 3/32"
SFS-1/8 1/8"

Sets of letters consist of 27 characters. Sets of figures consist of 9 characters.

SPECIAL LOCKSMITH STAMPS

LDND
DO NOT DUPLICATE

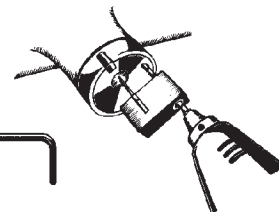

LMS
MASTER

LDNC
DO NOT COPY

Permanently mark a Master or Restricted key with HPC's special locksmith stamps. Let other locksmiths and key duplicators know it is a special purpose key and is part of a restricted system. The stamps are made of heavy duty steel stock, 3/8" X 5/8", hardened and flash-chromed for years of trouble free service.

IGNITION DRILL TEMPLATE FOR FORD

ITF-14

This template allows swift, precise removal of the side-bar so that replacement can be done almost immediately. Accuracy is ensured by the use of a key blank as a guide.
